18th Bristol Synthesis Meeting

In 2001 the annual Bristol Synthesis Meeting was launched and since then its popularity has steadily grown. Last year we had 420 participants, with over 350 students, making it the largest one-day chemistry meeting in Europe. The Bristol Synthesis Meeting has now established itself as a major fixture in the UK calendar of symposia. This year’s invited speakers are:

- Professor Sarah Reisman, California Institute of Technology
- Professor Stefan Matille, University of Geneva
- Professor Frank Glorius, University of Münster
- Professor George Whitesides, Harvard University
- Professor Jörn Piel, ETH Zurich

They are all giants in organic chemistry, having made major impacts in their own particular fields, and they continue to shape the future of our subject. They will, no doubt, provide a thoroughly enjoyable and inspiring day of chemistry.

With best wishes,

bs-meeting@bristol.ac.uk
09.15 Coffee
10.15 Welcome by Professor Nick Norman, Head of Chemistry
Chairman: Professor Chris Willis
10.30 The Roche Lecture
Professor Frank Glorius
On discovery in catalysis
11.30 The Elsevier Lecture
Professor Sarah Reisman
Necessity is the Mother of Invention: Natural Products and the Chemistry They Inspire
12.30 Lunch
14.00 The Nature Lecture
Professor Jörn Piel
Chemical acrobatics from hidden microbes
15.00 The Merck Lecture
Professor Stefan Matille
Functional Supramolecular Chemistry
16.00 Tea
Chairman: Professor Varinder Aggarwal FRS
16.30 The AstraZeneca Lecture
Professor George M. Whitesides
Are “Organic Synthesis” and “Chemical Engineering” Fusing
17.30 Wine Reception

SPONSORS
We warmly thank the following for sponsorship and other assistance with this meeting:

Advion
Astex Therapeutics
AstraZeneca
Apollo Scientific Ltd
Bayer
Bruker
Buchi UK Ltd
Elsevier
Evotec
Kinesis
Merck
Mettler-Toledo
Nature
Novartis
Radley
Roche
Strem
Syngenta
TCI Chemicals
Thermo Fisher Scientific
Tocris Bio—Techne
UCB
Unit DX
Wiley
